Cloud Engineer | github.com/kevinjosh10 | linkedin.com/in/kevin-josh10

PROFESSIONAL SUMMARY

Cloud Infrastructure Engineer and 2nd-year CS student executing a public 1000-Day Mission to master AWS Architecture and automated deployments. Focused on building scalable, serverless, and production-grade systems using infrastructure-as-code principles. High-agency builder with a bias for action and shipping real-world distributed systems.

SKILLS

Cloud & Infra:	AWS (Lambda, API Gateway, S3, IAM, CloudWatch, VPC), Docker, Kubernetes
DevOps:	GitHub Actions, CI/CD Pipelines, Bash Scripting, Linux System Administration
Programming:	Python (Boto3), C++, Java, JavaScript
Architecture:	Serverless Architecture, Event-Driven Systems, IoT Telemetry, Cost Optimization

ENGINEERING PROJECTS

CloudMorph Serverless Platform

- Engineered a secure, scalable serverless file intelligence platform deployed entirely on AWS.
- Designed a secure backend using AWS Lambda and API Gateway to process cross-origin document uploads.
- Implemented pre-signed URL generation for direct-to-S3 object transfers, bypassing compute bottlenecks.

Production-Grade S3 Backup CLI Tool

- Built a resilient synchronization utility for AWS S3 to automate secure, enterprise-grade backups.
- Developed a Python/Boto3 CLI featuring metadata-based incremental sync to reduce unnecessary network calls.
- Enforced AWS-native encryption and automated S3 lifecycle policies for cost-efficient, long-term archival.

EMG Sensor Firmware & IoT Architecture

- Architected an end-to-end IoT monitoring solution bridging embedded hardware and cloud infrastructure.
- Wrote embedded C++ firmware to capture biometric data, decoupling frontend and backend services.

Cryptexa & JCE Hub

- Refactored legacy monolithic web applications into highly available, modular serverless platforms.
- Secured API credentials using environment variable injection and automated deployments via GitHub Actions.

EDUCATION

Jerusalem College of Engineering

B.E. Computer Science and Engineering | 2nd Year

CERTIFICATIONS & INITIATIVES

- AWS Cloud Practitioner Learning Path (AWS Skill Builder)
- The 1000-Day Cloud Mission: Publicly documented daily engineering journey mastering modern cloud stacks.
